

Tamlite Sustainability Statement

Tamlite is committed to promoting good sustainability practices within our company and supporting our customers and partners. As one of the UK's leading lighting manufacturers we are mindful of the impact our operations and products can have on the environment and local communities. Reducing the environmental impacts, taking responsibility for our waste, and ensuring that our solutions valuing energy efficiency as a core consideration are fundamental to building sustainability at both a local and a global level.

Tamlite takes a vertical approach to sustainability across all aspects of the business:

Environmental and Recycling

- Seek to integrate sustainable development into our luminaire designs and develop products in line with circular economy principles
- Strive to manufacture luminaires with energy efficiency at the forefront of the design
- Through innovation, commitment to quality and testing, we endeavour to deliver solutions that are harmonious with the natural environment
- Manage our resources in the most efficient way, in order to reduce waste
- Maintain our long-term policy of investment in energy efficient technologies
- Ensure responsible waste removal and processing
- Offer our customers and partners a complete recycling solution

Social and Behaviour

- Encourage sustainable behaviour in our staff and clients
- Ensuring responsible behaviour and practice in all manufacturing processes
- Work in partnership with customers to promote the adoption of energy saving management and sustainable practices
- To review, and to continually strive to improve our sustainability performance
- Looking at new ways to approach luminaire design
- Reduce any negative impact of Tamlite's operations on the environment
- We aim to work with clients and partners who share the same ethos towards sustainability
- Reduce transport energy usage through improved performance and logistics reporting
- Continue to strive to comply with environmental legislation and standards

At Tamlite, we never stop striving to optimise the benefits that we deliver in a sustainable manner, ensuring the best for our planet now and in the future.
